

Self-Adhesive Reinforcement Kit

Package contains approximately one (1) yard of self-adhesive reinforcement material.
For best results, apply reinforcement material to a clean, dry surface.

Easy-to-use! Simply cut to the desired size, peel off backing, and attach to the underneath side of your boat cover. Reinforcement material is ideal for padding stress points. Add to the life of your boat cover by protecting it from sharp areas on windshields, trolling motors, and other accessories!
