

# Installing a Carver Golf Cart Cover

All Carver Golf Cart Covers are rolled and packaged with the front end of the cover to the outside. The tag on the front end is sewn to the *inside* of the cover for easy identification.

## **Before Installing Cover -**

Please be sure your golf cart is clean. Soiled covers cannot be exchanged or refunded.

Your Carver Cover will provide years of service if you take the precaution of examining your Golf Cart for sharp areas that could tear the cover. Taking a few moments to pad these areas before installing the cover will help extend the life of the cover. To install the cover, proceed as follows:

- Place the rolled cover on the front end of the unit.
- Roll the cover to the back end of the unit and pull the cover down over the sides of the golf cart, securing the elasticized hem underneath the unit.

## **Please Note -**

Your Golf Cart Cover is for storage only. Do not attempt to travel with the cover on, or partially on. Contact with hot surfaces will damage the cover.

## **Cleaning Instructions -**

To keep your cover looking its best, regularly brush off any loose dirt with a soft brush and rinse with lukewarm water. To clean, a solution of lukewarm water and mild natural soap such as Ivory™ may be used. Rinse thoroughly and allow to air dry. The use of detergent is not recommended as it may diminish the water repellent finish on certain fabrics and invite the growth of mildew. We also recommend the use of 303 Fabric & Vinyl Cleaner to safely remove dirt and difficult stains. Allow to dry thoroughly before folding for storage.

*Carver produces quality Bimini Tops, Boat Covers, Golf Cart Covers, Personal Watercraft Covers and Powersport Covers. We take great pride in the craftsmanship and attention to detail that goes into our products.*
