

California Proposition 65 Warning

Affected Carver Products:

All products manufactured from White Vinyl Material (part numbers containing “V” or “WV”), Inflatable Boat Mounting Kits (part numbers HPKIT and VLKIT), 303 Marine Multi-Surface Cleaner (part numbers 61058 and 61057) and Suction Cup Tie-Downs (part numbers 61003 and 61005) including T-Shade™ and Custom Under-the-T-Top boat covers that include Suction Cup Tie-Downs as an included accessory.

WARNING!

This product can expose you to chemicals including Diisononyl Phthalate (DINP), which is known to the State of California to cause cancer, birth defects, or other reproductive harm. DINP belongs to the family of chemicals called phthalates, which are added to some plastics to make them exible. DINP is one of the phthalates most frequently used in plastic products. Exposure occurs through ingestion, inhalation and, to a lesser extent, dermal contact with products that contain phthalates. For more information, go to www.P65Warnings.ca.gov.

Frequently Asked Questions

What is Proposition 65?

Proposition 65 is a law known as the California Safe Drinking Water and Toxic Enforcement Act of 1986. This law requires businesses to provide a clear and reasonable warning before exposing consumers, employees and the general public to chemicals that are known to the state of California to cause cancer, birth defects or other reproductive harm.

Where does the law apply?

The Proposition 65 warning applies to exposures from consumer products, emissions from facilities and workplace exposures in the State of California. Proposition 65 is a “Right to Know” law, not a Safety Law. This means that Proposition 65 does not ban the use of any chemicals, but rather inform the public of its exposure to certain chemicals.

What chemicals are involved?

The entire list of chemicals known by the state of California to cause cancer, birth defects or other reproductive harm can be found at <https://oehha.ca.gov/proposition-65/proposition-65-list>.

Am I at risk using a product with a Prop65 warning?

Proposition 65 warning does not mean that the product will actually cause cancer, birth defects or other reproductive harm when used in its intended manner. However, employees and consumers should be made aware of and heed all product handling and usage warnings.

Is my Carver Vinyl bimini top safe to use?

Yes. Used in its intended manner, your Carver Vinyl bimini top is perfectly safe to use. Prop65 standards for warnings are very stringent. Studies on the effects of DINP are based on ingestion, inhalation and, to a lesser extent, dermal contact. For additional information and studies on Diisononyl Phthalate (DINP), please visit <https://oehha.ca.gov/media/downloads/proposition-65/chemicals/dinphid100413.pdf>.

Why am I being warned?

If the possibility exists that a product containing a listed chemical will be purchased or received by a person in California, the business must provide a warning with its product. According to the regulations, the warning may appear:

- on a product or its packaging, or on written materials included with the product
- at the retail location by means of shelf labeling or signs
- prior to purchase on the internet or mail order sales, or the supplier must offer free return shipping
